

1 This listing of claims will replace all prior versions, and listings, of claims  
2 in the application:

3  
4 **Listing of Claims**

5 Claim 1-17 (Canceled)

6  
7 Claim 18 (Previously presented): The wireless communication device of  
8 claim 26 wherein the instructions are further comprised to send call forwarding  
9 instructions to service providers based on conditions set by the user.

10  
11 Claim 19 (Original): The wireless communication device of claim 18  
12 wherein the call forwarding instructions are to forward calls to a particular carrier  
13 network.

14 Claim 20 (Original): The wireless communication device of claim 18  
15 wherein the conditions are based on lowest cost to operate for a particular  
16 communication service.

17  
18 Claim 21 (Original): The wireless communication device of claim 18  
19 wherein the conditions are based on quality of service for a particular  
20 communication network.

21  
22 Claim 22 (Previously presented): The wireless communication device of  
23 claim 26 wherein the instructions comprise service set identifier numbers of  
24 wireless area networks accessible by the user.  
25

1 Claim 23 (Previously presented): The wireless communication device of  
2 claim 26 wherein the instructions are further comprised to store service set  
3 identifier numbers of wireless area networks accessible by the wireless  
4 communication device.

5 Claim 24 (Previously presented): The wireless communication device of  
6 claim 26 wherein the instructions are further comprised to store system  
7 identification number (SID) and access information of cellular networks accessible  
8 by the wireless communication device.

9 Claim 25 (Canceled)

10  
11 Claim 26 (Previously presented): A wireless communication device  
12 comprising:

13 a processor;

14 an antenna module configured to receive multiple radio frequency (RF)  
15 signals;

16 an analog to digital converter executable on the processor and configured to  
17 convert the RF signals to digital signal information used by the processor;

18 instructions stored in a memory executable on the processor to store  
19 location communication networks available to a user and determine from the  
20 digital signal information available communication networks to the user; and

21 a GPS module configured to receive RF signals from GPS satellites through  
22 the antenna module and analog to digital converter indicating location of the  
23 wireless communication device; wherein the instructions are further comprised of  
24 a map that indicates to a user relative location of the wireless communication  
25 device.

Claim 27-36 (Canceled)
